

## An Undergraduate Lecture Series

# Announcing

A Presentation  
on Thursday  
September 22, 2016  
at 3:00 pm in  
North Hall 102  
at The University of New Haven

### **Dr. Ramesh Sharma**

Department of Mathematics and Physics  
The University of New Haven

**Title: The Polish Mathematician, Joseph Hoene Wronski:  
A brief bio-sketch and some properties  
of the Wronskian**

### **Abstract:**

This talk will address a brief survey of the personality and struggles of H. Wronski. In addition, it will also provide background information, known results and a few new insights into the properties of the Wronskian function and its relationship with differential equations. The presentation will be kept simple, lucid and student friendly.

Pre-requisite: Elementary knowledge of determinants and differential equations.

### **Further Information**

For further information, please contact Angie Domschine at the Department of Mathematics, Office: Maxcy 204, 203-932-7250, ADomschine@newhaven.edu.
