Mortgage Contract and Refinancing Strategies

— Jin Zheng
Department of Mathematics
The University of Nevada

Abstract: This talk introduces the basic concepts related to mortgage contract, types of mortgage contract, different payment methods, refinancing strategies, and the value of mortgage contract. Examples of valuing mortgage contract are provided both for deterministic and stochastic market environment. We also investigate the best refinancing time for the debtors based on the view of balancing the profit and risk, where the best time is obtained by maximizing the utility function.
